

Special Issue on Image Processing: Theory and Applications

Call for Papers

Image processing is the application of a set of techniques and algorithms to a digital image to analyze, enhance, or optimize image characteristics such as sharpness and contrast, in order to get an enhanced image or to extract some useful information from it.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Image Processing: Theory and Applications**. Potential topics include, but are not limited to:

- Digital image processing
- Image processing algorithm
- Image acquisition, storage, transmission:
- Image segmentation and classification
- Learning-based image restoration
- Image fusion technique
- Image analysis and recognition
- Computer vision, graphics, and image processing
- Image processing and machine learning
- Systems science and signal Processing
- Image processing and reconstruction
- Medical/biomedical imaging
- Industrial applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Image Processing: Theory and Applications**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 8th, 2021
Publication Date	November 2021

Scientific Research
Open Access

Journal of Computer and Communications

ISSN Online: 2327-5227
