## Special Issue on Information Technology and Applications

### Call for Papers

Information technology (IT) is the application of computers to store, study, retrieve, transmit and manipulate data, or information, often in the context of a business or other enterprise. Several industries are associated with information technology, including computer hardware, software, electronics, semiconductors, internet, telecom equipment, and e-commerce.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information Technology and Applications**. Potential topics include, but are not limited to:

- Information processing
- Electronic data processing
- Data modeling
- Computing and information technologies
- Information science & engineering
- Information systems and information technology
- Information security
- Big data analytics
- Database management systems
- Information and knowledge management
- Intelligent information technologies
- Information and communications technology
- Quantum information science
- Health information technology
- Computer-aided design
- Computer integrated manufacturing
- IT applications in science, business and management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Information Technology and Applications**” should be chosen during your submission.

---

According to the following timetable:

Submission Deadline	March 30th, 2022
Publication Date	May 2022

For publishing inquiries, please feel free to contact the Editorial Assistant at [submission.entrance1@scirp.org](mailto:submission.entrance1@scirp.org)
