

Special Issue on Knowledge and Information Systems

Call for Papers

In an information system, Knowledge can be described as: “an awareness and understanding of a set of information and the ways that information can be used to support a specific task or reach a decision”. A knowledge management system is most often used in business in applications such as information systems, business administration, computer science, public policy and general management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Knowledge and Information Systems**. Potential topics include, but are not limited to:

- Information systems for knowledge management
- Knowledge management documents
- Knowledge representation and visualization
- Knowledge networks
- Knowledge architecture
- Knowledge organization and classification
- Knowledge in artificial intelligence systems
- Recognition and modes of knowledge
- Knowledge-based recommender system
- Fuzzy knowledge management systems
- Intelligent decision support systems
- Knowledge discovery and data mining
- Machine learning & big data analytics

Authors should read over the journal’s [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Knowledge and Information Systems**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 17th, 2022
Publication Date	August 2022

Scientific Research
Open Access

Journal of Computer and Communications

ISSN Online: 2327-5227
