

Special Issue on Systems and Networking

Call for Papers

Systems and networking is a broad and diverse area of computing research which spans areas including: systems, networks and distributed systems, programming languages and software engineering, compilers, databases and data science, security and cryptography, and mobile and wireless systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Systems and Networking**. Potential topics include, but are not limited to:

- Cloud computing
- Networking and distributed systems
- Distributed and parallel computing
- Operating systems
- Programming languages
- Machine learning for networking
- Digital communications and networks
- System analysis, design and implementation
- Network architecture
- Data structures
- Networked control systems
- Communication networks
- Wireless networks
- System software
- Software-defined networking
- Data center networking
- Automated analysis of security protocols
- Encryption and authentication
- Security and privacy
- Embedded systems
- Cyber-physical systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – *Systems and Networking***” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 30th, 2022
Publication Date	August 2022

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
