
Special Issue on Communication Networks and Protocols

Call for Papers

A network protocol can be defined as a set of rules, conventions and data structure which is used by network devices to communicate with each other across a network. The algorithm is a set of instructions that tells the system what to do.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Communication Networks and Protocols**. Potential topics include, but are not limited to:

- Protocol analysis
- Protocol development
- Algorithms and protocols
- Protocols and architectures
- Networking protocols
- Network security protocols
- Network planning and optimization
- Wireless communication protocol for IoT
- Transport layer protocol
- Transmission control protocol
- Routing protocol
- Data communications, networking and protocols

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Communication Networks and Protocols**” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|---------------------|
| Submission Deadline | February 28th, 2023 |
| Publication Date | April 2023 |
