

Special Issue on Information and Communication

Technologies and Applications

Call for Papers

Information and communications technology (ICT) is an extensional term for information technology that stresses the role of unified communications and the integration of telecommunications and computers, as well as necessary enterprise software, middleware, storage, and audiovisual systems, that enable users to access, store, transmit, and manipulate information.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information and Communication Technologies and Applications**. Potential topics include, but are not limited to:

- Cloud computing
- Models of access
- ICT security
- Modeling and simulation
- ICT integration
- Cognitive and intelligent systems
- Audiovisual technologies
- Networks and communications
- Data analytics and management
- Infocommunications
- Artificial intelligence
- Intelligent management system
- ICT and IoT
- ICT in medicine and healthcare
- Applied in environmental issues
- ICT in business and finance
- Other applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Information and**

Communication Technologies and Applications” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 6th, 2023
Publication Date	June 2023
