Special Issue on

Information, Network & Computer Security

Call for Papers

Information, Network & Computer Security is an academic topic that focuses on protecting computer systems, networks, and information from unauthorized access, attacks, and breaches. It involves studying various security measures such as encryption, authentication, access control, and intrusion detection to ensure the confidentiality, integrity, and availability of data. This field also explores the vulnerabilities and risks associated with computer networks and develops strategies to mitigate them. It plays a critical role in safeguarding sensitive information and ensuring the secure operation of computer systems and networks.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information, Network & Computer Security**. Potential topics include, but are not limited to:

- Cryptography and encryption
- AI and cybersecurity
- Computer and system security
- Computer forensics
- Internet of things (IoT) security
- Wireless network security
- Web and application security
- Network protocols and security
- Cloud security
- Mobile device security
- Data privacy and protection
- Threat intelligence and analysis
- Access control and authentication
- Malware analysis and detection
- Secure software development
- Risk assessment and management

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Information, Network & Computer Security***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 11th, 2024
Publication Date	May 2024
