

Special Issue on Data Science and Applications

Call for Papers

Data Science and Applications is an academic field that focuses on extracting meaningful insights from large and complex datasets. It involves the use of various mathematical, statistical, and computational techniques to analyze, interpret, and visualize data. Data Science finds applications in diverse domains such as business, healthcare, finance, and social sciences. Its aim is to uncover patterns, make predictions, and enable data-driven decision-making to drive innovation and improve processes in various industries.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Data Science and Applications**. Potential topics include, but are not limited to:

- Data mining
- Quantitative models
- Natural language processing
- Machine learning and predictive analytics
- Data visualization and visual analytics
- Network and data science
- Data security
- Cloud computing
- Decision-making
- Data optimization
- Internet of Things (IoT) analytics
- Data science and engineering
- Economics with data science
- Health informatics
- Social network analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Data Science and Applications**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 30th, 2024
Publication Date	June 2024

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
