

Special Issue on
Advances in Cancer Detection and Therapy

Call for Papers

As the leading cause of death in the developed world and the second leading cause of death in the developing world, cancer causes millions of people to die each year. Thus cancer detection and therapy has great importance to patients at an early stage. Common medical tests include blood tests, X-rays, CT scans and endoscopy. Many treatment options for cancer include surgery, chemotherapy, radiation therapy and palliative care depended upon the type, location and grade of the cancer as well as the person's health and wishes. As **Cancer Detection and Therapy** play an important role in cancer prevention and management, further study has significant importance and necessity.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **cancer detection and therapy**. Potential topics include, but are not limited to:

- Cancer diagnosis
- Cancer screening
- Cancer prevention
- Anti-cancer drugs
- Cancer treatment and side effects
- Food therapy and other new method

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Cancer Detection and Therapy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 15th, 2015
Publication Date	March 2015
