

Special Issue on Diabetic Complications & Medicine

Call for Papers

Diabetes is currently the disease with the most known complications, which increases the risk of many serious health problems. Through correct treatment and recommended lifestyle changes, many people with diabetes can prevent or delay the onset of complications. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Diabetic Complications & Medicine**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Diabetic Complications & Medicine**. Potential topics include, but are not limited to:

- Prevention and treatment of diabetic complications
- Complications of prediabetes
- Gestational diabetes
- Diabetic retinopathy
- Diabetic nephropathy
- Diabetic neuropathy
- Cardiovascular diseases
- Foot damage
- High blood pressure
- Skin complications
- Peripheral vascular disease
- Depression

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Diabetic Complications & Medicine**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 17th, 2021
Publication Date	October 2021
