Prof. Claude Verdier University of Grenoble, France
Dr. Jinying Yuan Tsinghua University, China
Prof. Chang-Ying Zhao Shanghai Jiao Tong University, China

TABLE OF CONTENTS

Volume 2 Number 3

September 2012

Determination of the Optimal Speed of Pultrusion for Large-Sized Composite Rods

A. Krasnovskii, I. Kazakov.....21

On the Rupture of a Liquid Film Formed on a Droplet Crossing a Horizontal Liquid-Liquid Interface

J. Mitrovic.....27

On Damped Wave Diffusion of Oxygen in Pancreatic Islets: Parabolic and Hyperbolic Models

K. R. Sharma.....33

Syntheses and Adsorption Property Research of N-Diethyl Imidazole Modified PS Resins for Iodine

W. X. Luo, X. Y. Zhao, M. Luo.....42

Complexation of Both Enantiomers of 2-Phenylpropionic Acid with Cyclodextrin:

Determination of Binding Constant, Stoichiometry, Bioavailability and Co-Conformation

A. A. Dahab, N. W. Smith.....48

The figure on the front cover is from the article published in *Journal of Encapsulation and Adsorption Sciences*, 2012, Vol. 2, No. 3, pp. 27-32 by Jovan Mitrovic.

Journal of Encapsulation and Adsorption Sciences (JEAS)

ISSN: 2161-4865 (Print) ISSN: 2161-4873 (Online)
<http://www.scirp.org/journal/jeas>

Journal of Encapsulation and Adsorption Research (JEAS) is an international, specialized, English-language journal devoted to publication of original contributions concerning with the processes and technology adsorption and also encapsulation (nano-, micro...) for applications including among others:

Biomedical and pharmaceutical applications with drug delivery systems (transdermal, oral), biomarkers, nanomedicine, nano-tagants with fluorescent dyes encapsulated, theranostics, biomimetics...

Food technology,

Cosmetics,

Textiles,

Biochemistry,

Optics,

Photonics,

Environment, energy storage, thermal insulation and reinforcement materials.

It is an open-access, peer-reviewed journal describing scientific and technological advances that cover the basic sciences, engineering aspects and applied technology of molecules (proteins, enzymes, food, fragrance, gas...) as well as other diverse materials encapsulation and adsorption with preparative manipulation and related materials properties. The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including but not limited to the following materials (as bulk, films, nanoparticles), studies and techniques:

- Hydrogels, polymers, (sol-gel) glasses, ceramics, inorganic-organic hybrid materials, porous materials and metal-organic framework as bulk or films, multi-functional particles, nanocapsules, and any other host matrices and materials supports of interest.
- Bioadsorption
- Biocatalysis
- Bioencapsulation
- Bioencapsulation techniques processes and instrumentation.
- Coating process of encapsulated materials
- Coatings
- Colloids and formulations
- Controlled release
- Molecular interactions studies, surface properties
- Pharmaceuticals
- Technical processes and analytical methods

Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are referred through a peer review process. For more details about the submissions, please access the website.
