

Special Issue on Electromagnetic Compatibility

Call for Papers

Electromagnetic Compatibility is the branch of electrical sciences which studies the unintentional generation, propagation and reception of electromagnetic energy with reference to the unwanted effects that such energy may induce. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **electromagnetic compatibility**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **electromagnetic compatibility**. In this special issue, potential topics include, but are not limited to:

- Types of interference
- Continuous interference
- Pulse or transient interference
- Coupling mechanisms
- Conductive coupling
- Inductive coupling
- EMC control

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - *Electromagnetic Compatibility***” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 24th, 2014
Publication Date	June 2014

Guest Editor:

Prof. **Vladimir N. Binh**

General Physics Institute, Russian Academy of Sciences, Moscow
