

Special Issue on Environmental Pollutant Analysis

Call for Papers

Environmental Analysis is to study the environment with analytical chemistry methods and other techniques. The purpose of this is to monitor and study levels of pollutants in the atmosphere, rivers and other specific settings. Pollutant analysis is good for environment control. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **environmental pollutant analysis**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **environmental pollutant analysis**. In this special issue, potential topics include, but are not limited to:

- Heavy metals detection
- Waste water analysis
- Exhaust gas analysis
- Pesticide residue analysis
- Have poison analysis
- Light pollution analysis
- Waste gas analysis

Authors should read over the journal's <u>Authors' Guidelines</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue** - *Environmental Pollutant Analysis*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 25th, 2014
Publication Date	August 2014

Guest Editor: Prof. **Shuguang Deng** New Mexico State University, USA
