

Special Issue on Environmental Pollution and Human Health

Call for Papers

The foundation of human health is the living environment of human beings. Only ecosystems with rich, stable and sustainable biodiversity can guarantee the stability and sustainable development of human health. There are many factors that affect human health, and the most important ones are lifestyle factors, environmental factors, biological factors and health care service factors, of which environmental pollution is the enemy of human health. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Pollution and Human Health**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Pollution and Human Health**. Potential topics include, but are not limited to:

- Health risks and ecological restoration
- Environment pollution and health
- Modelling and measuring of water pollution
- Chemical pollutants and its effects on health
- Water quality and public health
- Health effects from noise
- Risk assessment of contaminated environments
- Environmental pollution and its control
- Air pollution and health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Pollution and Human Health**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 25th, 2020
Publication Date	November 2020

Guest Editor:

Scientific Research
Open Access

Journal of
Environmental Protection
ISSN Online: 2152-2219
