

Special Issue on Environmental Chemistry and Pollution

Call for Papers

Environmental chemistry is an interdisciplinary science that studies chemical and biochemical phenomena occurring in water, air, terrestrial and living environments, and the effects of human activity on the natural environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Environmental Chemistry and Pollution.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Chemistry and Pollution**. Potential topics include, but are not limited to:

- Ecotoxicology
- Green chemistry
- Hazardous waste
- Heavy metals
- Industrial chemistry
- Microplastics
- Micropollutants
- Plastic waste
- Soil chemistry
- Solid waste
- Bioaccumulative pollutants
- Biochemical toxicology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Chemistry and Pollution**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 8th, 2022
Publication Date	August 2022
