

Special Issue on Environmental Monitoring and Analysis

Call for Papers

Environmental Monitoring and Analysis is a tool to characterize and monitor environmental quality, which includes the air, water and land quality. It designs the monitoring systems, describes methods and procedures for pollution risk assessment, and examines the synthesis of monitoring data with toxicological, epidemiological and health data. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Environmental Monitoring and Analysis.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Monitoring and Analysis**. Potential topics include, but are not limited to:

- Air quality monitoring
- Ecotoxicology and ecobiology
- Environmental chemistry & toxicology
- Environmental life cycle
- Environmental monitoring technology
- Nanosensors for environmental applications
- Noise monitoring and control
- Pollution source monitoring
- Soils quality monitoring
- Waste quality monitoring
- Water quality monitoring

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Monitoring and Analysis**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 16th, 2022
Publication Date	October 2022
