

Special Issue on Waste Recycling and Disposal

Call for Papers

Waste is a stinging and widespread problem in both urban and rural areas worldwide. Waste management focuses on the process of collecting, recycling and disposing all types of wastes, including industrial, biological, household, municipal, organic, biomedical, radioactive wastes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Waste Recycling and Disposal.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Waste Recycling and Disposal**. Potential topics include, but are not limited to:

- Combustibles
- Construction waste
- Generation and storage
- Hazardous waste
- Incineration
- Industrial waste
- Medical waste
- Metal waste
- Onsite handling, storage, and processing
- Organic waste
- Plastic waste
- Recovery and recycling
- Recyclables
- Solid waste
- Solid waste collection
- Sorting and shredding
- Toxic waste
- Waste paper
- Waste processing and recovery
- Waste reduction
- Waste sorting and segregation
- Waste transfer and transport

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Waste Recycling and Disposal**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 27th, 2022
Publication Date	September 2022
