

Special Issue on Global Environmental Issues

Call for Papers

Environmental issues are effects of human activity on our planet environment. Environment destruction caused by humans is a global, ongoing problem. The environmental problems like urban sprawl, waste disposal, water pollution, global warming, acid rain, air pollution, ozone layer depletion, climate change and many more affect every human, animal, and creature on this planet. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Global Environmental Issues.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Global Environmental Issues**. Potential topics include, but are not limited to:

- Acid rain
- Deforestation
- Disaster
- Global warming
- Loss of biodiversity
- Ocean acidification
- Overpopulation
- Ozone layer depletion
- Pollution
- Waste disposal
- Public health issues
- Environmental degradation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Global Environmental Issues**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 20th, 2022
---------------------	--------------------

Publication Date	December 2022
------------------	---------------
