Environmental Pollution and Chemistry is a comprehensive field of study that focuses on understanding and analyzing the various forms of pollution that harm our environment and exploring the chemical processes associated with them. This interdisciplinary field encompasses research and analysis related to air pollution, water pollution, soil contamination, and the impact of pollutants on ecosystems and human health. By investigating the sources, behavior, and effects of pollutants, as well as developing mitigation strategies, Environmental Pollution and Chemistry aims to safeguard our planet and create a sustainable and healthier environment for future generations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Environmental Pollution and Chemistry. Potential topics include, but are not limited to:

- Air pollution
- Bioaccumulative pollutants
- Biochemical toxicology
- Ecotoxicology
- Green chemistry
- Hazardous waste
- Heavy metals
- Industrial emissions
- Microplastics
- Micropolllutants
- Plastic waste
- Soil and sediment
- Soil chemistry
- Solid waste
- Toxic substances
- Water quality

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Environmental Pollution and Chemistry” should be selected during your submission.
Special Issue Timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>February 29th, 2024</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>April 2024</td>
</tr>
</tbody>
</table>
