Editors-in-Chief
Nobuyuki Fujisawa
Niigata University, Japan
Tetsuhiro Tsukiji
Sophia University, Japan
S. H. Winoto
Universitas Diponegoro, Indonesia

Editorial Advisory Board
Fujio Fujio Yamamoto
Fukui University, Japan
Yousef Haik
Qatar University, Qatar
Tomichichi Hasegawa
Niigata College of Technology, Japan

Regional Editors
J. Chen
Peking University, China
Jean R. Hertzberg
University of Colorado, USA
Chin Tsau Hsu
Hong-Kong University of Science & Technology, China
Toshiharu Kagawa
Tokyo Institute of Technology, Japan
Juergen Kompenhans
DLR, Germany

Editorial Board
G. M. Carlomagno
University of Naples, Italy
Li Hao Feng
Beijing University of Aeronautics and Astronautics, China
J. M. Floryan
The University of Western Ontario, Canada
Toshiyuki Hayase
Tohoku University, Japan
Hwung Hweng Hwung
National Cheng Kung University, Chinese Taipei
Victor V. Kozlov
Institute of Theoretical and Applied Mechanics, Russia
Su-Xun Li
China Academy of Aerospace Aerodynamics, China
Kazuyoshi Nakabe
Kyoto University, Japan
Kazuo Ohmi
Osaka Sangyo University, Japan
Jinjun Wang
Beijing University of Aeronautics and Astronautics, China
Qing-Ding Wei
Peking University, China

Scientific Board
Maolin Cai
Beihang University, China
Yoshihiro Deguchi
The University of Tokushima, Japan
Shumpei Funatani
University of Yamanashi, Japan
Yves Gagnon
Universite de Moncton, Canada
Shouichiro Iio
Shinshu University, Japan
Rui Alberto Lima
Braganca (IPB) & CEFT/Porto University (FEUP), Portugal
Makoto Ohta
Tohoku University, Japan
Guoyi Peng
Nihon University, Japan
Takayuki Yamagata
Niigata University, Japan
C. Youn
Tokyo Institute of Technology, Japan
# Table of Contents

**Volume 4   Number 2   April 2016**

**Nonlinear Acoustic Shadow Method to Reduce Reverberation Artifact**  
K. Fujisawa, A. Asada

**Visualization of High-Speed Impact of Penetrator into Icy Target**  
K. Suzuki, K. Namba, Y. Watanabe

**Suppression of Vortex Precession in a Non-Contact Handling Device by a Circular Column**  
S. Iio, K. Hayashi, E. Akahane, Y. Katayama, S. Veerapun, X. Li, T. Kagawa
Journal of Flow Control, Measurement & Visualization (JFCMV)

If expert assistance is required, the services of a competent professional person should be sought.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jfcmv@scirp.org
This Journal is aimed at publishing original articles with visual images which will demonstrate facts to assist in the understanding of the presented information. Each article submitted should not have been published before nor simultaneously submitted for publication elsewhere.

Editors-in-Chief

Nobuyuki Fujisawa  Niigata University, Japan
Tetsuhiro Tsukiji  Sophia University, Japan
S. H. Winoto  Universitas Diponegoro, Indonesia

Subject Coverage

JFCMV is a quarterly online international journal. This journal will cover a wide range of experimental and computational articles in the fields of flow control, measurement and visualization. The fields include topics related to acoustics, aeronautics, biomedical and life sciences, combustion, fluid mechanics, heat transfer, hydraulics, micro and nano fluids, multiphase flow, ocean and wind engineering, optical measurement, safety management technology, scientific arts, sports science, turbo machinery, turbulence, visual information, and others.

Two types of articles will be considered for publication in the Journal:

Original Paper: Original articles are encouraged to submit. The submitted article should be less than 14 pages long in the template format, while the paper less than 7 pages is recommended if it requires rapid communication. A few extra pages may be accepted free of charge after the review.

Review Paper: Review articles are encouraged to submit. The submitted article should be less than 20 pages long in the template format. A few extra pages may be accepted free of charge after the review.

Since the Journal focuses on publishing visual experimental and computational data, visual images are important factors for publication consideration.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
