PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:

E-mail: jfcmv@scirp.org

Journal of Flow Control, Measurement & Visualization

ISSN 2329-3322 (Print) ISSN 2329-3330 (Online) https://www.scirp.org/journal/jfcmv

The Journal of Flow Control, Measurement & Visualization (JFCMV) is aimed at publishing original articles with visual images which will demonstrate facts to assist in the understanding of the presented information. Each article submitted should not have been published before nor simultaneously submitted for publication elsewhere.

Editors-in-Chief

Jun Chen Shouichiro Iio Peking University, China Shinshu University, Japan

Subject Coverage

JFCMV is a quarterly online international journal. This journal will cover a wide range of experimental and computational articles in the fields of flow control, measurement and visualization. The fields include topics related to acoustics, aeronautics, biomedical and life sciences, combustion, fluid mechanics, heat transfer, hydraulics, micro and nano fluids, multiphase flow, ocean and wind engineering, optical measurement, safety management technology, scientific arts, sports science, turbo machinery, turbulence, visual information, and others.

Three types of articles will be considered for publication in the Journal:

Regular Paper: Original academic articles are encouraged to submit. The submitted article should be less than 14 pages long in the template format, while the paper less than 7 pages is recommended if it requires rapid communication. A few extra pages may be accepted free of charge after the review.

Review Paper: Review articles are encouraged to submit. The submitted article should be less than 20 pages long in the template format. A few extra pages may be accepted free of charge after the review.

Technical Paper: Original articles with highly emphasis on the engineering application are encouraged to submit, which includes the case study article. The page limit is the same as the regular paper.

Since the JFCMV focuses on publishing visual experimental and computational data, visual images are important factors for publication consideration.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
