

Special Issue on Financial, Operational, and Business Risk

Call for Papers

The financial risk analytics covers analytical techniques involved in risk and investment management. The financial risks include pricing, valuation hedging, and risk analytics across various assets, as well as the credit risk, market risk, regulatory risk capital, and advisory valuation adjustment. Operational and business risk can be internal (such as our strategy) or external (such as the global economy), which can be to any event or circumstance that has the potential to prevent us from achieving the business goals or objectives. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Financial, Operational, and Business Risk.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Financial, Operational, and Business Risk**. Potential topics include, but are not limited to:

- Asset management
- Bankruptcy prediction
- Cash management
- Compliance and regulatory risk
- Currency risk in emerging market
- Debt management
- Financial planning
- Financial risk
- Foreign exchange risk
- Fund management
- Investment and risk
- Market risk management
- Mortgage
- Operational risk
- Strategic risk

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Financial, Operational, and Business Risk**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 30th, 2023
Publication Date	March 2023
