

## Special Issue on Geomatics

### (GIS, RS and Other Spatial Information Technologies)

#### Call for Papers

Geomatics is the study that focuses on gathering, storing, processing, and delivering geographic information or spatially referenced information. It includes the tools and techniques used in land surveying, remote sensing, cartography, geographic information systems, global-navigation satellite systems, photogrammetry, geophysics, geography, and related forms of earth mapping.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geomatics**. Potential topics include, but are not limited to:

- Compass
- Lidar
- Cartography
- Hydrography
- Mapping
- Geospatial technology
- Geomatics engineering
- Survey engineering
- Topographic science
- Disaster informatics
- Air navigation
- Environmental monitoring

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geomatics (GIS, RS and Other Spatial Information Technologies)**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 28th, 2018
Publication Date	October 2018

Scientific Research  
*Open Access*

Journal of Geographic Information  
System

ISSN Online: 2151-1969
