Special Issue on GIS & Geographic Analysis

Call for Papers

Geographic information is the meaning contained in geographic data. It is information about specific locations on the surface of the earth. It is a representation of the nature, characteristics, and state of movement of geographic entities and all useful knowledge. By analyzing these data, we can understand geographic regions, spatial levels, dynamics, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **GIS & Geographic Analysis.**

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **GIS & Geographic Analysis**. Potential topics include, but are not limited to:

- Geospatial analysis and computation
- Statistical analysis of geographic information
- Geographical analysis and theory
- Data analysis
- Multi-criteria decision analysis
- Spatial analysis with geographical information system (GIS)
- Digital geologic mapping
- GIS analysis: geographic patterns & relationships

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *GIS & Geographic Analysis***" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 11th, 2020
Publication Date	January 2021
