

Special Issue on
Geographic Information System and Applications
Call for Papers

A Geographic Information System (GIS) is a technology that captures, stores, analyzes, manages, and presents spatial or geographic data. It allows users to visualize, understand, and interpret data in a geographic context. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Geographic Information System and Applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geographic Information System and Applications**. Potential topics include, but are not limited to:

- Analyzing crime patterns
- Cartographic modeling
- Data layers
- Digital geologic mapping
- Disaster measures
- Forecasting and predicting weather
- Geocoding
- Geoinformatics
- Geomatics
- Geospatial data infrastructure
- Geostatistics
- GIS data mining
- GIS mapping
- GIS technology
- Pinpointing locations
- Reporting power outages
- Routing in car navigation
- Spatial analysis
- Spatial interpolation
- Web mapping

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geographic Information System and Applications**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 16th, 2024
Publication Date	July 2024
