Editor-in-Chief

Prof. Christian Corda  
Section of Physics of Santa Rita School of Advanced  
Academic Studies and Research, Italy

Editorial Board

Dr. Kazuharu Bamba  
Fukushima University, Japan

Dr. Andrew Beckwith  
Department of physics, PRC (visiting scholar) Chongqing University, USA

Dr. Alexander Burinskii  
Laboratory of Theoretical Physics in Nuclear Safety Institute of the  
Russian Academy of Sciences, Russia

Prof. Farhad Darabi  
Azarbaijan Shahid Madani University, Iran

Dr. Luca Fabbri  
University of Bologna, Italy

Dr. Seyed Hossein Hendi  
Shiraz University, Iran

Dr. Huda E. Khalid  
Mosul University, Iraq

Dr. Lino Miramonti  
Università degli Studi di Milano, Italy

Dr. Hooman Moradpour  
Research Institute for Astronomy and Astrophysics of Maragha (RIAAM), Iran

Prof. Jorge Ovalle  
Simón Bolívar University, Venezuela

Prof. Waldyr A. Rodrigues Jr.  
Institute of Mathematics, Statistics and Scientific Computation State  
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero  
DISAT, Polytechnic University of Turin, Italy

Dr. Burra Gautam Sidharth  
International Institute of Applicable Mathematics & Information  
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar  
Intel Corporation, USA

Dr. Lorenzo Zaninetti  
Department of Physics, Italy
# Table of Contents

**Volume 6  Number 2  April 2020**

**The Benefits of Affine Quantization**  
J. R. Klauder ................................................................. 175

**Measurement Quantization Describes History of Universe—Quantum Inflation, Transition to Expansion, CMB Power Spectrum**  
J. A. Geiger ........................................................................ 186

**Quantum Cosmological Tetration of Time**  
A. McCoss ........................................................................ 225

**Relativistic Newtonian Gravitation That Gives the Correct Prediction of Mercury Precession**  
E. G. Haug ........................................................................ 238

**What Is a Muon Anyways: Meson or Lepton!?**  
L. M. Ionescu ..................................................................... 244

**Novel Consequences of Coexistence of Matter and Antimatter in Nature**  
M. A. Abdel-Raouf ............................................................ 251

**Entropy and Negentropy Principles in the I-Theory**  
H. H. S. Isa, C. Dumas ........................................................ 259

**Neutrino Masses and See-Saw Mechanism**  
A. Tarhini, M. Mrad ........................................................... 274

**World-Universe Model Predictions**  
V. S. Netchitailo ............................................................... 282

**Approximate Reformulation a Recent Non-Renormalizable QFT’s Methodology and Einstein’s Gravity**  
A. Plastino, M. C. Rocca ..................................................... 298
Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC)

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

**Subject Coverage**

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
