Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita School of Advanced
Academic Studies and Research, Italy

Editorial Board

Prof. Mohamed Assaad Abdel-Raouf

Physics Department, Faculty of Science, Ain Shams University, Egypt
Fukushima University, Japan

Dr. Kazuharu Bamba

Dr. Andrew Beckwith

Department of physics, PRC (visiting scholar) Chongqing University,
USA

Prof. Elmo Benedetto

Department of Computer Science, University of Salerno, Italy

Dr. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azarbaijan Shahid Madani University, Iran

Dr. Luca Fabbri

University of Bologna, Italy

Dr. Maria Emília Xavier Guimarães

Instituto de Física, Universidade Federal Fluminense, Brazil

Dr. Seyyed Hossein Hendi

Shiraz University, Iran

Dr. Huda E. Khalid

Mosul University, Iraq

Prof. Maria Paola Lombardo

Istituto Nazionale di Fisica Nucleare, Italy

Dr. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jean Perron

Department of Applied Sciences (DSA) University of Québec in
Chicoutimi, Canada

Prof. Christopher Pilot

Gonzaga University, Spokane, WA, USA

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

DISAT, Polytechnic University of Turin, Italy

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathemaics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Lorenzo Zaninetti

Department of Physics, Italy

Table of Contents

Volume 9 Number 2

April 2023

Faster than the Speed of Light Is a Quantum Phenomenon

A. Irani.....379

On the Physical Nature of Einstein’s Gravitational Lensing Effect

W. H. Qian.....383

Using “Graviton Gas”, Suggesting Onset of Gravitational Quantum Pressure Using Very Simple Arguments

A. W. Beckwith.....400

The Accelerated Expansion of the Universe

A. Irani.....407

Trials to Resolve Black Holes Instabilities in Brane World Cosmology Models

P. Tadros, M. A. Abdel-Raouf.....411

Ionic Gravitation and Ionized Solid Iron Stellar Bodies

G. S. Sandhu.....414

Why Don’t Cold White Dwarfs Exist?

Q. H. Peng, J. J. Liu.....438

The Quantum Chromodynamics Gas Density Drop and the General Theory of Relativity Ether

R. Rom.....445

Matter Reactors

R. Rom.....455

The Principal Role of Antimatter

R. Rom.....461

Quantum Physics Has a New, and Remarkable, Expansion

J. R. Klauder.....467

Proton-Proton Collisions in View of Thermo-Statistical Approach

M. T. Hussein, Z. Abdel-Halim, M. T. Ghoneim.....475

New Conservation Law and a Consideration as to When Forming a Cosmological Constant Term: Using Fifth Force for Frequency of BEC “Gravitons” and Cosmological Constant Formed before BEC Gravitons Form

A. W. Beckwith.....489

Gamma-Ray Bursts and Fermi Bubbles

K. Dalton.....496

Black Holes and the Third Law of Thermodynamics Revisited

M. Socolovsky.....499

The General Relativistic Perspective

D. G. Taylor.....506

Hawking Temperature and the Quantum Pressure of the Schwarzschild Black Hole

K. P. Chandra.....515

The Black Hole Spray and the Cosmic Web

R. Rom.....519

Part I: Explaining the “Muon $g - 2$ ” Results with Probabilistic Spacetime

D. M. Doren, J. Harasymiw.....524

Part II: Explaining Black Hole Growth due to Universal Expansion: Probabilistic Spacetime versus GEODEs

D. M. Doren, J. Harasymiw.....530

Part III: Explaining the “Extra” Heat of Intergalactic Hydrogen Clouds with Probabilistic Spacetime

D. Doren, J. Harasymiw.....542

Does a Fine Tuning of a Quartic Potential Allow for an Invariant Cosmological Constant? How This Supposition Could Lead to a Macro Model of Pressure in the Start of Inflation?

A. W. Beckwith.....552

Does the Transition to Planckian Space Time Physics Allow Octonionic Gravity Conditions to Form?

A. W. Beckwith.....561

Call for Papers

Journal of High Energy Physics, Gravitation and Cosmology

ISSN Print: 2380-4327 ISSN Online: 2380-4335
<https://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
