

Special Issue on Cybersecurity and Information Security

Call for Papers

Cybersecurity and Information Security is the protection of computer systems and networks from information disclosure, theft of or damage to their hardware, software, or electronic data, as well as from the disruption or misdirection of the services they provide.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Cybersecurity and Information Security**. Potential topics include, but are not limited to:

- Security models and architectures
- Secure coding
- Cryptography and encryption
- Software security
- Operating system security
- Cyber physical systems security
- Data privacy and protection
- Authentication and access control
- Cloud security
- Mobile network security
- IoT security and privacy
- Cybersecurity risk mitigation
- Vulnerability assessments
- Machine learning techniques
- Big data security
- Malware & security attack
- Network protocols and security
- Industrial control systems security
- Smart systems, AI and cybersecurity

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Cybersecurity and Information Security**” should be chosen during your submission.

According to the following timetable:

Scientific Research
Open Access

Journal of Information Security

ISSN Online: 2153-1242

Submission Deadline	December 23rd, 2022
Publication Date	February 2023
