

## Special Issue on Cybersecurity and Information Security

### Call for Papers

Cybersecurity and Information Security is the protection of computer systems and networks from information disclosure, theft of or damage to their hardware, software, or electronic data, as well as from the disruption or misdirection of the services they provide.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Cybersecurity and Information Security**. Potential topics include, but are not limited to:

- Security models and architectures
- Network security protocols
- Applied cryptography
- Network and system security
- Computer system forensics
- Data and information security
- Confidentiality, integrity and availability
- Identity and access management
- Data privacy policies
- International cyber defense
- Machine learning techniques
- Information security and assurance
- Cloud security
- Big data security
- IoT security
- Smart systems, AI and cybersecurity

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Cybersecurity and Information Security**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 28th, 2023
---------------------	-----------------

Scientific Research  
*Open Access*

**Journal of Information Security**

ISSN Online: 2153-1242

Publication Date	August 2023
------------------	-------------
