

Special Issue on Financial Market Volatility

Call for Papers

In finance, volatility is the degree of variation of a trading price series over time as measured by the standard deviation of logarithmic returns.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **financial market volatility**. Potential topics include, but are not limited to:

- Volatility for investors
- Volatility versus direction
- Volatility over time
- Implied volatility parametrisation
- Crude volatility estimation
- Estimate of compound annual growth rate (CAGR)
- Criticisms of volatility forecasting models
- Volatility hedge funds

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Financial Market Volatility**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 25th, 2018
Publication Date	August 2018
