

Special Issue on Financial Engineering Research

Call for Papers

Financial engineering is the use of mathematical techniques to solve financial problems. It includes not only financial product design, but also financial product pricing and transaction strategy design, financial risk management and other aspects. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of financial engineering.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Financial Engineering Research**. Potential topics include, but are not limited to:

- Asset pricing
- Asset-liability management
- Capital budgeting and financial planning
- Computational and mathematical finance
- Corporate performance and efficiency analysis
- Financial forecasting and econometric
- Project finance
- Fund management
- Operations research/management science models in finance
- Risk metrics and risk management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Financial Engineering Research**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 16th, 2023
Publication Date	July 2023

Guest Editor:

Scientific Research
Open Access

Journal of Mathematical Finance

ISSN Online: 2162-2442
