

Special Issue on Non-ferrous Metals and Alloys

Call for Papers

Nonferrous metals offer a wide variety of mechanical properties and material characteristics. Nonferrous metals are specified for structural applications requiring reduced weight, higher strength, nonmagnetic properties, higher melting points, or resistance to chemical and atmospheric corrosion. They are also specified for electrical and electronic applications. Material selection for a mechanical or structural application requires some important considerations, including how easily the material can be shaped into a finished part and how its properties can be either intentionally or inadvertently altered in the process. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Non-ferrous Metals and Alloys**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Non-ferrous Metals and Alloys**. In this special issue, potential topics include, but are not limited to:

- Recycling and pollution control
- Mechanical and structural use
- Mechanical properties and material characteristic
- Alloys of non-ferrous metals
- Chemical properties of nonferrous metals
- The physical properties of the non-ferrous metal

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Non-ferrous Metals and Alloys**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 14th, 2020
Publication Date	October 2020

Guest Editor:

Scientific Research
Open Access

**Journal of Minerals and Materials
Characterization and Engineering**

ISSN Online: 2158- 7086
