

Special Issue on Zinc and Its Compounds

Call for Papers

Zinc is mainly used as a protective coating for iron and steel (galvanising). It is further used for the production of zinc alloys (e.g. brass), rolled zinc, zinc dust (a pigment and a reducing agent), and zinc compounds (e.g. zinc oxide). The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Zinc and Its Compounds**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Zinc and Its Compounds**. In this special issue, potential topics include, but are not limited to:

- Physical properties of Zinc
- Chemical properties of Zinc
- Reactivity of metallic zinc
- Zinc composite
- Zinc nanomaterials
- Zinc alloy
- Applications of Zinc compounds

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Zinc and Its Compounds**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 16th, 2021
Publication Date	March 2021
