Dr. Anca Tureanu  Academy of Finland, Finland
Dr. A. L. Roy Vellaisamy  City University of Hong Kong, China
Prof. Yuan Wang  University of California, Berkeley, USA
Prof. Magnus Willander  Linköping University, Sweden
Prof. Fan Yang  Fermi National Accelerator Laboratory, USA
Prof. Peter H. Yoon  University of Maryland, USA
Dr. S. Zerbini  University of Trento, Italy
Prof. Meishan Zhao  James Frank Institute, University of Chicago, USA
Prof. Pavel Zhuravlev  University of Maryland at College Park, USA
Table of Contents

Volume 5 Number 14 August 2014

Magnetic Hysteresis and Complex Initial Permeability of Cr$^{3+}$ Substituted Mn-Zn Ferrites

The Periodic Table of Elementary Particles Based on String Theory
D.-Y. Chung ....................................................................................................................................................... 1234

A Perdurable Defence to Weyl’s Unified Theory
G. G. Nyambuya .............................................................................................................................................. 1244

The Angular Momenta Dipole Moments and Gyromagnetic Ratios of the Electron and the Proton
A. Georgiou ....................................................................................................................................................... 1254

Structure and Electrical Properties of Fe$_2$O$_3$-Doped PZT-PZN-PMnN Ceramics
L. D. Vuong, P. D. Gio ...................................................................................................................................... 1258

Bohr’s Spectrum of Quantum States in the Atomic Hydrogen Deduced from the Uncertainty Principle for Energy and Time
S. Olszewski ...................................................................................................................................................... 1264

Variational Principle in the Quantum Statistical Theory
E. A. Arinshteyn ............................................................................................................................................... 1272

A Study of Multifractal Spectra and Renyi Dimensions in 14.5A GeV/c $^{28}$Si-Nucleus Collisions
N. Ahmad, A. Kamal, M. M. Khan, Hushnud, A. Tufail ............................................................... 1288

What Does Monogamy in Higher Powers of a Correlation Measure Mean?
P. J. Geetha, Sudha, A. R. U. Devi ............................................................................................................... 1294

Motion Characteristics of Single Electrons of Atoms of Atomic Gas of Hydrogen and Single Electrons of Hydrogen-Like Ions in Form Gas or Vapour during Decays of Such Atoms and Ions. Emission Line Spectra
I. A. Strilets ..................................................................................................................................................... 1302

Power Balance of Multi-Harmonic Components in Nonlinear Network
B. H. Huang, X. Y. He .................................................................................................................................... 1321

Relativity of Speed of Light with Speed of Universe Expansion
D. Sampat ....................................................................................................................................................... 1332
Bi-Directional Signal Transmission in EPR Correlation

N. Hokkyo

Brief Note on a Scalar Quantum Field with Finite Lifetime in a Lorentz Invariant Non-Rectangular Euclidean Space

C. Tornow

Some Aspects of Multiparticle Production in Relativistic Nuclear Collisions

M. I. Haque, M. Tariq, H. Jahan, T. Hussain

And If Bell's Inequality Were Not Violated

O. Serret

Physics in Discrete Spaces: On Quantum Theory

P. Peretto

Influence of Surfactant and Salt Concentration on the Rheological Properties of Three Different Microstructures of Associative Polyelectrolytes Obtained by Solution Polymerization

A. I. Velazquez-Garcia, G. Cadenas-Pliego, C. C. Rivera-Vallejo, E. J. Jimenez-Regalado
Journal of Modern Physics (JMP)

http://www.scirp.org/journal/jmp

Journal of Modern Physics (JMP) is an international journal dedicated to the latest advancement of modern physics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of modern physics.

Editor-in-Chief
Prof. Yang-Hui He
City University, UK

Executive Editor-in-Chief
Prof. Marko Markov
Research International, Buffalo Office, USA

Subject Coverage

Journal of Modern Physics publishes original papers including but not limited to the following fields:

- Biophysics and Medical Physics
- Complex Systems Physics
- Computational Physics
- Condensed Matter Physics
- Cosmology and Early Universe
- Earth and Planetary Sciences
- General Relativity
- High Energy Astrophysics
- High Energy/Accelerator Physics
- Instrumentation and Measurement
- Interdisciplinary Physics
- Materials Sciences and Technology
- Mathematical Physics
- Mechanical Response of Solids and Structures
- New Materials: Micro and Nano-Mechanics and Homogenization
- Non-Equilibrium Thermodynamics and Statistical Mechanics
- Nuclear Science and Engineering
- Optics
- Physics of Nanostructures
- Plasma Physics
- Quantum Mechanical Developments
- Quantum Theory
- Relativistic Astrophysics
- String Theory
- Superconducting Physics
- Theoretical High Energy Physics
- Thermology

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

http://www.scirp.org/journal/jmp    E-mail: jmp@scirp.org
What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
