# Table of Contents

## Volume 7 Number 15  November 2016

### A Contribution to the DLF-Theory: On Singularities of the SU(2,2)-Action in U(1,1)
A. Levichev .......................................................... 1963

### Completing Einstein’s Spacetime
M. S. El Naschie .......................................................... 1972

### KELEA (Kinetic Energy Limiting Electrostatic Attraction) Offers an Alternative Explanation to Existing Concepts Regarding Wave-Particle Duality, Cold Fusion and Superconductivity
W. J. Martin .......................................................... 1995

### Fowler-Nordheim Tunneling, Photovoltaic Applications and New Band Structure Models of Electroconductive a-CN_x:H Films Formed by Supermagnetron Plasma CVD
H. Kinoshita .......................................................... 2008

### Characteristics of GaN Thin Films Using Magnetron Sputtering System
H. F. Huq, R. Y. Garza, R. Garcia-Perez .......................................................... 2028

### Evolution and Definition of Dark Energy (Gravitons)
S. S. Sastry .......................................................... 2038

### Theory of a Kaptiza-Dirac Interferometer with Cold Trapped Atoms
R. L. Cheng, T. C. He, W. D. Li, A. Smerzi .......................................................... 2043

### Black Hole Entropy from Entropy of Hawking Radiation
S. Aghapour, K. Hajian .......................................................... 2063

### Extending the Truncated Dyson-Schwinger Equation to Finite Temperatures
S. M. Dorkin, M. Viebach, L. P. Kaptari, B. Kämpfer .......................................................... 2071

### A Brief Note on the Clock-Hypothesis
A. Schlatter .......................................................... 2098

### The Speed of the Passing of Time as Yet Another Facet of Cosmic Dark Energy
M. S. El Naschie .......................................................... 2103

### The Nature of Inertial and Vacuum Gravitational Field
N. Wu .......................................................... 2126
New Quantum Theory Explains All the Mysterious Quantum Phenomena
N. S. Agarwal

Einstein’s Non-Euclidean Line Element Theory and Quantum Mechanics Interpretation
X. Z. Wu

Some Mathematical and Physical Remarks on Surreal Numbers
J. A. Nieto

Exact Axisymmetric Solutions of the 2-D Lane-Emden Equations with Rotation
D. M. Christodoulou, D. Kazanas

The Natural Law of Transition of a Charged Particle into a Compound State under the Action of an Electroscalar Field
O. A. Zaimidoroga

Classical and Quantum Behavior of Generalized Oscillators in Terms of Linear Canonical Transformations
A. Ogura

Spring Theory as an Approach to the Unification of Fields
L. M. Tsang

Evidences for a Unified Physics, in Full Accordance with the Newtonian Laws
A. Bacchieri

The figure on the front cover is from the article published in Journal of Modern Physics, 2016, Vol. 7, No. 15, pp. 2008-2027 by Haruhisa Kinoshita.
Call for Papers

Journal of Modern Physics

ISSN: 2153-1196 (Print)    ISSN: 2153-120X (Online)
http://www.scirp.org/journal/jmp

Journal of Modern Physics (JMP) is an international journal dedicated to the latest advancement of modern physics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of modern physics.

Editor-in-Chief
Prof. Yang-Hui He
City University, UK

Executive Editor-in-Chief
Prof. Marko Markov
Research International, Buffalo Office, USA

Subject Coverage

Journal of Modern Physics publishes original papers including but not limited to the following fields:

- Biophysics and Medical Physics
- Complex Systems Physics
- Computational Physics
- Condensed Matter Physics
- Cosmology and Early Universe
- Earth and Planetary Sciences
- General Relativity
- High Energy Astrophysics
- High Energy/Accelerator Physics
- Instrumentation and Measurement
- Interdisciplinary Physics
- Materials Sciences and Technology
- Mathematical Physics
- Mechanical Response of Solids and Structures
- New Materials: Micro and Nano-Mechanics and Homogenization
- Non-Equilibrium Thermodynamics and Statistical Mechanics
- Nuclear Science and Engineering
- Optics
- Physics of Nanostructures
- Plasma Physics
- Quantum Mechanical Developments
- Quantum Theory
- Relativistic Astrophysics
- String Theory
- Superconducting Physics
- Theoretical High Energy Physics
- Thermology

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

http://www.scirp.org/journal/jmp    E-mail: jmp@scirp.org
What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
