

## Special Issue on Plasma Physics Research

### Call for Papers

Plasma physics is the study of charged particles and fluids interacting with self-consistent electric and magnetic fields. It is a basic research discipline that has many different areas of application - space and astrophysics, controlled fusion, accelerator physics and beam storage. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of plasma physics research.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **plasma physics research**. In this special issue, potential topics include, but are not limited to:

- Properties and parameters
- Inductively coupled plasmas
- Magnetically induced plasmas
- Ion effect
- Plasma technology
- Plasma theory
- Plasmas in nature
- Industrial plasmas
- Plasma applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Plasma Physics Research**” should be chosen during your submission.

Special Issue timetable:

Submission Deadline	June 23rd, 2016
Publication Date	August 2016
