

## Special Issue on Condensed Matter Physics

### Call for Papers

The field of condensed matter physics explores the macroscopic and microscopic properties of matter. Condensed Matter physicists study how matter arises from a large number of interacting atoms and electrons, and what physical properties it has as a result of these interactions. The condensed matter field is considered one of the largest and most versatile sub-fields of study in physics, primarily due to the diversity of topics and phenomena that are available to study. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **condensed matter physics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **condensed matter physics**. In this special issue, potential topics include, but are not limited to:

- Quantum properties of matter
- Theory of condensed matter physics
- Solid state electron theory
- Macroscopic quantum state
- Nanostructures and mesoscopic physics
- Soft matter physics
- Applications of condensed matter physics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Condensed Matter Physics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 29th, 2023
Publication Date	January 2024

**Guest Editor:**

For further questions or inquiries

**Scientific Research**  
*Open Access*

**Journal of Modern Physics**

ISSN Online: 2153-120X
