PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jpee@scirp.org
Table of Contents

Volume 5  Number 12                                December  2017

Assessment of Vertical Magnetic Gradient Data of Tuzla Fault Using Boundary Analysis and 3-D Inversion Techniques
E. Timur .................................................................................................................................33

Demonstration of a Dynamic Braking System for Reduced Runaway Speed of Hydraulic Turbines
U. Lundin, J. Bladh ................................................................................................................46

Vortex Method of Localization of Thermonuclear Plasma
E. P. Smirnov ..........................................................................................................................58

A Numerical Prediction of Tip Vortices from Tandem Propellers in the Counter-Rotating Type Tidal Stream Power Unit
H. Jung, T. Kanemoto, P. Liu ..................................................................................................66

Impacts of Water-Tree Fault on Ferroresonance in Underground Cables
B. Sun, E. Makram, X. F. Xu ....................................................................................................75

Desulphurization of Transportation Fuels by Per-Formic Acid Oxidant Using MoO₃ Loaded on ZSM-5 Catalyst
W. Ahmad, I. Ahmad ..............................................................................................................87

Efficiency of Energy Utilisation in a Nigeria Sausage Producing Factory

Choice of Site for the Installation of Photovoltaic Solar Power Plants in Senegal: Consequences on Electricity Production
M. Faye, A. Thiam ..................................................................................................................109

PV Characterization System Outdoors—Case Study in Brazil
P. R. Silva, P. R. da Silva Jota, A. P. Batista ........................................................................119

On the Mathematical Modelling of Adaptive Darrieus Wind Turbine
P. M. Kumar, K. R. Ajit, N. Srikanth, T.-C. Lim .....................................................................133
Call for Papers

Journal of Power and Energy Engineering

ISSN Print: 2327-588X  ISSN Online: 2327-5901
http://www.scirp.org/journal/jpee

Journal of Power and Energy Engineering (JPEE) is an international journal dedicated to the latest advancement of power and energy engineering. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of power and energy engineering.

Editor-in-Chief
Prof. Elias K. Stefanakos
University of South Florida, USA

Editorial Board
Dr. Roberto Capata
Prof. Wei-Hsin Chen
Dr. Chun-Hu Cheng
Dr. Smith Elamsa-ard
Prof. D. Yogi Goswami
Prof. Zhongjie Huan
Dr. Freddie Liswaniso Inambao
Prof. Nneneisi A. Kgabi

Prof. Ching-Fuh Lin
Prof. Rodolfo Dufo López
Prof. Elham B. Makram
Prof. George Papadakis
Dr. Elias Papanicolaou
Dr. Raul Rabonivici
Prof. M. Ramamoorthy
Dr. Manuel Romero

Dr. Ravi S. Srinivasan
Dr. Vittorio Verda
Prof. Valery Vodovozov
Prof. Nikolai Voropai
Prof. Chao Xu
Dr. Wenxian Yang
Dr. Xiaowei Zhou

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

1. Power Generation—Conventional and Renewable
   - Bio-energy technologies, process and utilization
   - Environmentally-friendly technologies for power generation
   - Geothermal and tidal wave energy
   - Hydropower technologies and applications
   - New technologies and design for energy efficiency
   - New technologies for minimizing CO₂ generation
   - Other sustainable energy
   - Photovoltaic for solar power applications
   - Safe nuclear energy generation and utilization
   - Thermal power technologies and applications
   - Waste products as fuel
   - Wind power generation and utilization

2. Power System Management
   - Application of wide area measurement system (WAMS)
   - Control strategies for modern power system stability
   - Integrated substations automation technologies
   - Load modeling, estimation and forecast
   - Modeling and simulation of large power systems
   - Online monitoring and fault diagnosis system
   - Power system analysis and optimization
   - Power system management technologies

3. Power Transmission and Distribution
   - Power system monitoring and mitigation technologies
   - Power system planning and operation
   - Advanced distribution and SCADA technologies
   - Electromagnetic analysis in power systems
   - Electromagnetic compatibility in power systems
   - Electromagnetic transient in high voltage power systems
   - HVDC and flexible AC transmission system (FACTS)
   - Insulation condition monitoring in power systems
   - Over-voltage, lightning protection and grounding
   - Plasma physics and the pulsed power technology
   - Ultra High Voltage (UHV) technologies

4. Smart Grid Technologies
   - Agent-based Computational Economics for Grid
   - Agent-based mechanisms for Grid markets
   - Agent-based simulation of Grid environments and markets
   - Automated negotiation for Grid resource allocation
   - Engineering of Grid markets and Grid architectures
   - Modeling of Grid environments
   - Resource allocation in Grid scenarios using agent-based approaches
   - Technical research on future application domains

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

The submitted manuscript should not have been previously published in any form and must not be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All paper are refereed through a peer process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
