Special Issue on Biomedical and Health Informatics

Call for Papers

Biomedical informatics is the science of information as applied to or studied in the context of biomedicine. Health informatics is the practice of acquiring, studying and managing health data and applying medical concepts in conjunction with health information technology systems to help clinicians provide better healthcare.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Biomedical and Health Informatics**. Potential topics include, but are not limited to:

- Clinical informatics
- Public health informatics
- Health and biomedical information System
- Health information technology
- Smart health
- Computer-assisted medical decision
- Machine learning in healthcare data analysis
- Internet of medical things
- Electronic health records management
- Applications of artificial intelligence
- Remote healthcare services
- Telemedicine and eHealth
- Biomedical intelligence systems
- Medical imaging informatics
- Safety, quality, informatics
- Hospital information system
- Internet-based medical treatment
- Health informatics in the time of COVID-19

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Biomedical and Health Informatics***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 26th, 2022
Publication Date	October 2022

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
