Special Issue on Information Systems and Computer Science

Call for Papers

"Information Systems and Computer Science" is an academic topic that encompasses the study and application of computer science principles and practices in the context of information systems. It focuses on understanding how information is collected, stored, processed, and disseminated in various organizational settings. This field explores topics such as software development, database management, network administration, cybersecurity, and human-computer interaction. It aims to develop and optimize technology solutions that support and enhance the efficiency, effectiveness, and security of information management within organizations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information Systems and Computer Science**. Potential topics include, but are not limited to:

- Data management and analytics
- Information systems and decision sciences
- Management information system
- Knowledge management system
- Cybersecurity and privacy
- Human-computer interaction
- Application of AI techniques
- Internet of Things (IoT)
- Cloud computing and distributed systems
- Information systems strategy and governance:
- Electronic commerce system
- Emerging technologies and innovations

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Information Systems and Computer Science***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 19th, 2024
Publication Date	May 2024

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
