

Special Issue on Feminist Thought Research

Call for Papers

Feminism is a social movement that crosses the boundaries of class and race. The term "feminists" first appeared in the form of French, which was created by Charles Fourier, a French utopian socialist. Today, feminism is not just a simple ideology. In fact, feminism has formed many schools. Generally speaking, feminist theory can be divided into micro theory and macro theory, of which the emphasis is to achieve equality between men and women. Due to the emergence and development of feminist thought, women's rights have been protected, and the dignity of women has been recognized by the society. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of feminist thought.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **feminist thought research**. Potential topics include, but are not limited to:

- Feminism and patriarchy
- Feminist epistemology
- The influence of feminism on social development
- The significance of feminist literature
- Eco-feminism
- Feminist standpoint theory
- Feminist empiricism
- Postmodern feminism

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue** – *Feminist Thought Research*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	July 26th, 2017
Publication Date	September 2017

Guest Editor:

Open Journal of Social Sciences

ISSN Online: 2327-5960
