Special Issue on Pandemics and Social Science

Call for Papers

A pandemic is a global disease outbreak that has spread across a large region, for instance multiple continents or worldwide, affecting a substantial number of people. It is often caused by a new virus or a strain of virus that has not circulated among people for a long time. The pandemics often create social disruption, economic loss, and general hardship. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Pandemics and Social Science.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Pandemics and Social Science. Potential topics include, but are not limited to:

- Black death
- Hemorrhagic fever
- Ebola virus disease
- SARS outbreaks
- Cholera outbreaks
- Viral outbreaks
- Norovirus outbreaks
- Zika virus
- Plague pandemic
- Influenza pandemic
- COVID-19 pandemic
- Pandemic disease events
- Pandemic prevention
- Historical pandemics
- Economic consequences

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Pandemics and Social Science” should be selected during your submission.

Special Issue Timetable: 
Submission Deadline | December 20th, 2021
Publication Date | February 2022
