Special Issue on Information Society and Management

Call for Papers

Information Society is a term for a society in which the usage, creation, distribution, manipulation and integration of information has become the most significant economic and cultural activity. It uses the information and communication technologies and has resulted in rapid information growth in variety and is somehow changing all aspects of social organization, such as education, economy, health, and politics. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Information Society and Management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Information Society and Management. Potential topics include, but are not limited to:

- Communications technologies
- Computer information
- Economic transition
- Education provision and participation
- Information culture
- Information history
- Information industry
- Information revolution
- Intellectual property
- Internet culture
- Network society
- Social and economic change
- Social media

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Information Society and Management” should be selected during your submission.
