

Special Issue on Transportation Engineering and Planning

Call for Papers

Transportation engineering involves the application of principles from science, technology, engineering, and mathematics to address the challenges associated with planning, designing, constructing, maintaining, and operating transportation infrastructure systems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Transportation Engineering and Planning**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Traffic and Transportation Systems**. Potential topics include, but are not limited to:

- Traffic modeling
- Transportation networks
- Public transportation
- Sustainable transportation
- Urban transportation planning
- Traffic and mobility management
- Technological changes and transportation development
- Historical development of transportation
- Transportation problems
- Transportation infrastructure
- Transportation vehicles

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Transportation Engineering and Planning**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 2nd, 2021
Publication Date	August 2021

Guest Editor:

Scientific Research
Open Access

**Journal of Transportation
Technologies**
ISSN Online: 2160-0481
