

Special Issue on Urban Transportation

Call for Papers

Urban transportation is the movement of people and goods within urban areas using various modes of transportation such as cars, buses, trains, bicycles, walking, etc. Urban transportation is a crucial aspect of urban planning and has significant impacts on the economy, environmental sustainability, and social equity. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Highway and Transportation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Urban Transportation**. Potential topics include, but are not limited to:

- Public transportation
- Urban mobility
- Urban planning
- Traffic engineering
- Sustainable transportation
- Transportation policy
- Traffic congestion
- Pedestrian and bicycle infrastructure
- Transit-oriented development
- Shared mobility
- Ride-hailing services
- Parking management
- Urban logistics
- Intermodality
- Transport demand management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Urban Transportation**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 20th, 2024
Publication Date	May 2024
