

## Special Issue on Drinking Water and Human Health

### Call for Papers

Water makes up more than two thirds of human body weight, and without water, we would die in a few days. Your body is estimated to be about 60 to 70 percent water. Blood is mostly water, and your muscles, lungs, and brain all contain a lot of water. The health and livelihood of human depends on the availability of a safe drinking water supply. In some portions of the nation drinking water is a scarce resource, while in other areas abundant water supplies are available. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **drinking water and human health**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **drinking water and human health**. In this special issue, potential topics include, but are not limited to:

- Drinking water contaminant
- Safety of drinking water
- Drinking water standards
- Drinking water quality monitoring
- Drinking water purification
- Importance of drinking water

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Drinking Water and Human Health**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 27th, 2015
Publication Date	July 2015
