

Special Issue on Wastewater Treatment and Recycling

Call for Papers

Water reuse occurs in various ways throughout the world. It happens daily on rivers and other water bodies everywhere. As world populations require both more clean water and better ways to dispose of wastewater, the demand for water reclamation will increase. Future success in water reuse will depend on whether this can be done without adverse effects on human health and the environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **wastewater treatment and recycling**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **wastewater treatment and recycling**. In this special issue, potential topics include, but are not limited to:

- Wastewater reuse for agriculture
- Wastewater reuse for industry
- Wastewater reuse for aquaculture
- Stormwater reuse
- Water recovery
- Sewage treatment technology
- Natural groundwater chemistry

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Wastewater Treatment and Recycling**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 29th, 2016
Publication Date	August 2016
