

Special Issue on Water, Health and Development Call for Papers

Water is essential in human life. The clean water avoids gastrointestinal diseases caused by water pollution. In less developed or undeveloped countries and areas, there are still many people who die from these diseases. Therefore, the realization of water sanitation and the protection of healthy water are of great significance to the development of water resources. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Water, Health and Development**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water, Health and Development**. Potential topics include, but are not limited to:

- Water supply and sanitation monitoring
- Drinking water quality and health
- Rural water supply and sanitation
- Water quality: guidelines, standards & health
- Sustainable water development
- Water resource development and management
- Water pollution and human health
- Technology in water development

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water, Health and Development**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 17th, 2020
Publication Date	November 2020

Guest Editor:

Scientific Research
Open Access

Journal of
Water Resource and Protection
ISSN Online: 1945-3108
