

Special Issue on Water Quality and Health

Call for Papers

Water quality describes the condition of the water, including chemical, physical, and biological characteristics, and is usually about its suitability for a specific purpose, such as drinking or swimming. The quality of drinking water is related to human health. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Water Quality and Health**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water Quality and Health**. Potential topics include, but are not limited to:

- Water quality monitoring, assessment and management
- Water security
- Drinking water
- Drinking water contaminants
- Water quality standards
- Water safety
- Indicators of water and waste quality
- Impacts of water quality on food quality
- Impact of climate change on water quality
- Water-based insect vectors of disease
- Water policy and health
- Chemical and physical quality of water

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water Quality and Health**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 17th, 2021
Publication Date	December 2021

Guest Editor:

Scientific Research
Open Access

**Journal of Water Resource
and Protection**
ISSN Online: 1945-3108
