

Special Issue on Sustainable Water Use

Call for Papers

Water is the largest natural resource but only 3% of it is freshwater, of which just 1/3 is accessible for use in our daily life. Sustainable water use is the use of water in a way that meets current, ecological, social, and economic needs without compromising the ability to meet those needs in the future. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Sustainable Water Use.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sustainable Water Use**. Potential topics include, but are not limited to:

- Agriculture water management
- Aquaculture and water resource management
- Climate change and water quality
- Simulation and modelling of water resource systems
- Urban water systems
- Water & wastewater treatment
- Water and disaster risk management
- Water and energy
- Water and sanitation
- Water and sustainable cities
- Water and the green economy
- Water management techniques
- Water politics
- Water purification technologies
- Water resource allocation
- Water resources management
- Water supply and sanitation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Water Use**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 31st, 2022
Publication Date	July 2022
